Technology Consultation, Implementation & On-Going Support

C2 Online Backup and Monitoring Service

Is your data protected and accessible when you need it the most? When it comes to the data on your computer what would happen if the unthinkable happened and you lost it? Invoices, purchase orders, accounting records and customer contact information are all critical for your day to day operations of your business. Permanent loss of critical data due to natural or man-made disasters can be extremely costly and could even determine the survival of your business! For home users, music, photos and videos are memories which can be lost forever. Even if you have data backup processes currently in place, are you confident that your backups are successful each and every time and that your data can be restored quickly and without any loss?

C2 Online Backup and Monitoring Service guarantees your data is protected and available when you need it!

Backing up data is one of the most critical and often overlooked tasks for businesses today. **C2 Technology** can help you develop a data protection plan and properly backup and monitor your critical data. Our **C2 Backup Service** is powered by MozyPro and provides an affordable, secure, and reliable solution to offsite data backup to a secure encrypted data center. Your **C2 Backup Service** also includes daily monitoring of your offsite backups to ensure backups are not missed and data storage levels are appropriate.

Affordable, Secure, Easy to Use Backups

❖ Pricing

- **Desktops:** Monthly charge per PC - \$10 plus \$1 per GB (10 GB min)
- **Servers:** Monthly charge per PC - \$15 plus \$1 per GB (30 GB min)
- **Additional Storage:** Additional GB's sold in blocks of 5GB for \$5
- Monthly, quarterly, semi-annual and annual billing options available.
- NO SETUP FEES
- Includes daily monitoring of your offsite backups.

❖ Security

- **Encryption:** All user data is encrypted locally with military-grade encryption prior to transfer via a 128-bit SSL connection. Users can choose a managed encryption key or a personal key for added security.
- **Data Centers:** All data centers employ state-of-the-art security and are SAS70 or ISO certified.
- **Near Continuous Data Protection:** MozyPro automatically detects and backs up new and changed files.

❖ Easy To Use

- **Automatic or scheduled backups:** Tell MozyPro when to perform your remote backups. Automatic is the simplest method in which backups are performed while your computer is not in use. Scheduled remote backups can be performed daily or weekly at a specified time of day.
- **Block-level incremental backups:** After the initial backup, Mozy only backs up new or changed portions of files, which saves bandwidth and ensures future backups are lightning fast.
- **Bandwidth throttling:** You can tell MozyPro to use more or less of your upload bandwidth so other higher priority services can run unimpeded.
- **Multiple restore options:** Restore data via the Mozy software client, through the web, or by ordering a DVD restore. Windows users can also restore data via right-click or through the Mozy Virtual Drive.
- **Local backup with Mozy 2xProtect:** Windows users can now backup locally to a USB or external drive in addition to online for double protection.

❖ Platform and File Support

- **Version (snapshot) support:** Restore file versions up to 30 days in the past.
- **SQL, Exchange, and network drive support:** Back up data residing on virtually any machine.
- **Windows and Mac support:** MozyPro offsite backup supports Windows (2000, XP, 2003, and Vista, 2008, including servers) and Mac OS X (10.4, 10.5, 10.6 desktop and server) operating systems.
- **Open/locked file support:** MozyPro backs up all open and locked files, including Outlook PST files.
